

V4AIR

V4 AI Researchers Meetup

FOR PARTNERS

Meet researchers who use AI methods in every field

V4AIR brings PhD students and early-career researchers from four countries together for three days. We invite companies, investors and former researchers to take part.

28-30 April 2027

three days

Kostelec Castle

30 minutes from Prague

6 universities

Czechia, Hungary, Poland,
Slovakia

Selected participants

PhD students and early-career researchers

Matched by method, across fields

Ecology

insects on flowers in video

Transport

cyclists at a busy crossing

Same method: tracking many small objects that overlap

Participants are selected so that each person meets the right people.

Why partners

Participants want to know where their AI skills can take them, in research or outside it.

You can show them, and meet the people who have those skills.

EXPECTED FIELDS

[FIELDS: to be confirmed]

Ways to take part

01

Give a talk

How your team uses AI methods, or how you moved from research into industry.

02

Join the expo

Participants present their work at an expo. Partners can have a stand there.

03

Run a workshop

Teach a method or tool your team works with.
