

prg.ai is co-organizing the **V4 AI Researchers Meetup**

In April 2027, PhD students and early-career researchers from Czechia, Hungary, Poland and Slovakia who use AI in their research meet for three days near Prague. We are inviting our partners and collaborators to join them.

What V4AIR is

Researchers in many fields use the same AI methods, yet they rarely meet. V4AIR matches them by method, across disciplines.

Ecology
insects on flowers in video

Transport
cyclists at a busy crossing

Same method: tracking many small objects

Come meet the foremost **Central European AI experts** from fields like NLP, computer vision, machine learning and more.

Machine learning

Computer vision

Natural language processing

Agentic AI

Statistical and causal modeling

Speech and signal processing

 **Kostelec Castle**, 30 minutes from Prague

 **28–30 April 2027**

 **Three days**, with accommodation at the castle

If you're interested in sharing your experience in a talk or workshop, supporting the meetup in other ways, or just participating to meet Central Europe's best talent, reach out to Lenka.

ORGANISED BY

Lenka Kučerová prg.ai lenka@prg.ai

The programme is in preparation, and nothing here commits either side.
