How to use this template

Make a copy of this document (File → Make a copy). Then replace the sample text. The header and footer repeat on every page, so you do not need to edit them.

Use the paragraph styles in the style menu. Do not change fonts or colours by hand. The styles already carry the V4AIR brand.

Lists

Use bullets for items in no particular order:

- Short items, one idea each.
- No full stop after a fragment.
- Full stop after a full sentence.

Use numbers for steps:

1. Make a copy of this template.
2. Write the content in the paragraph styles.
3. Share the copy, not this template.

Callouts

Use a quote block for one key point that readers must not miss. Keep it to two or three sentences.

Links

Write links as words, for example [the V4AIR website](#). Do not paste bare addresses into running text.
